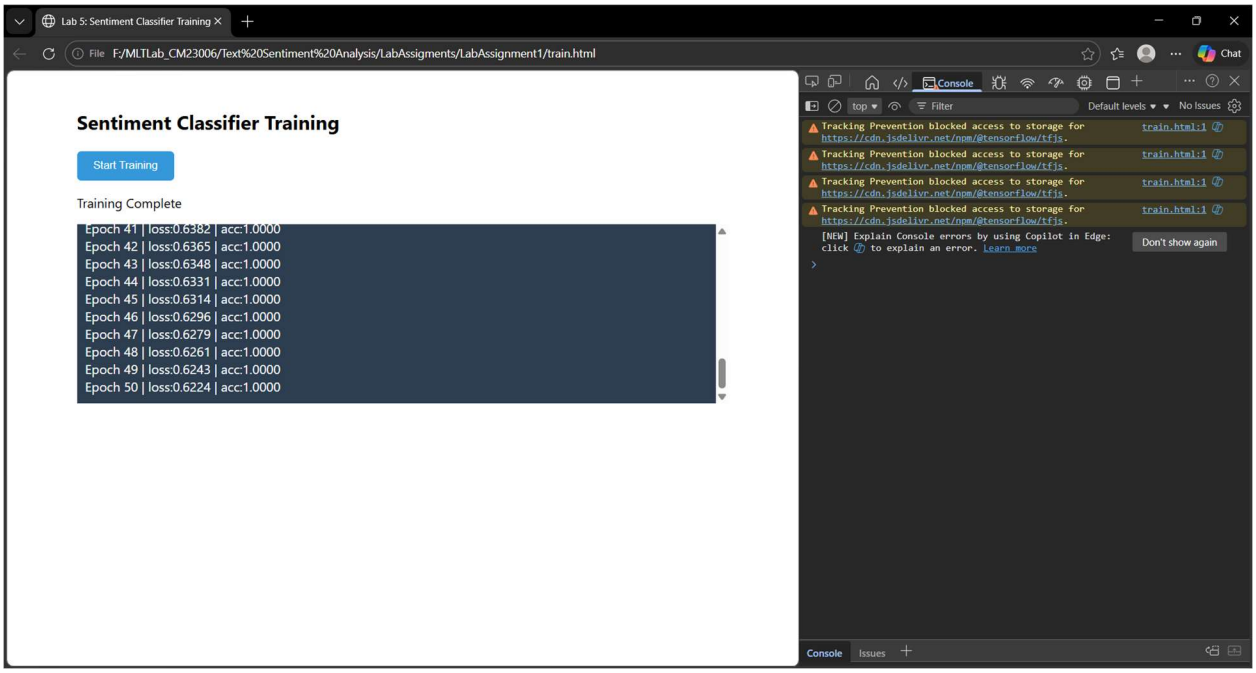
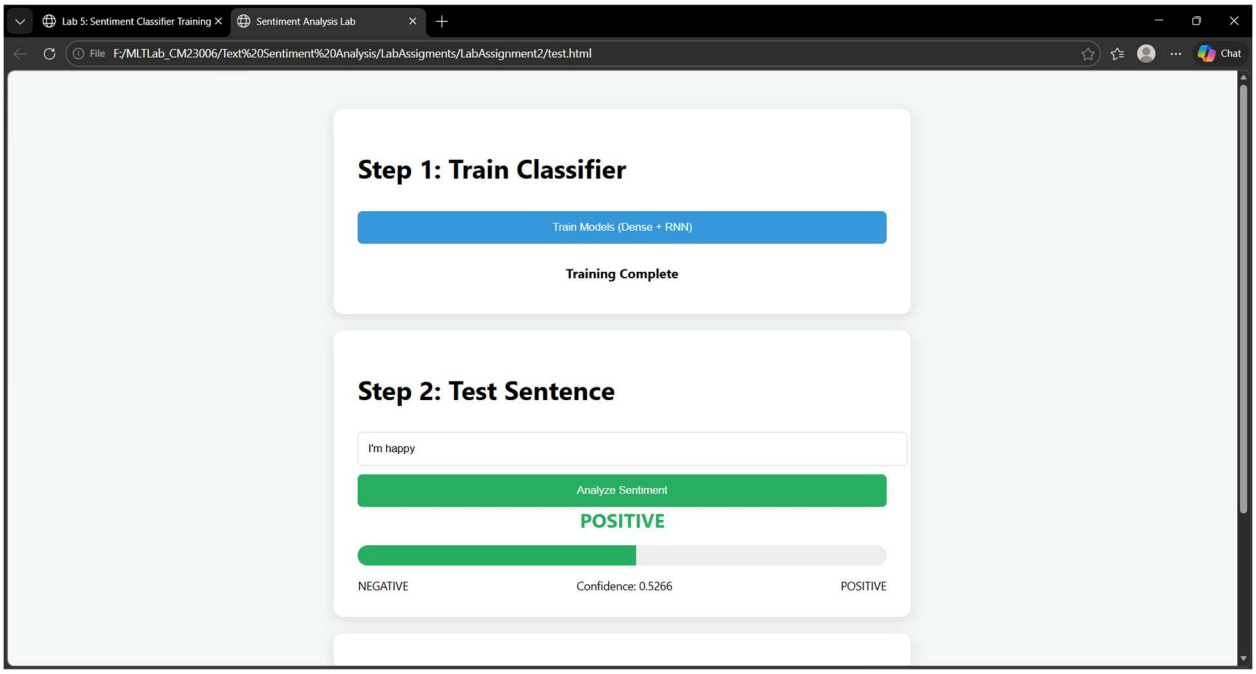
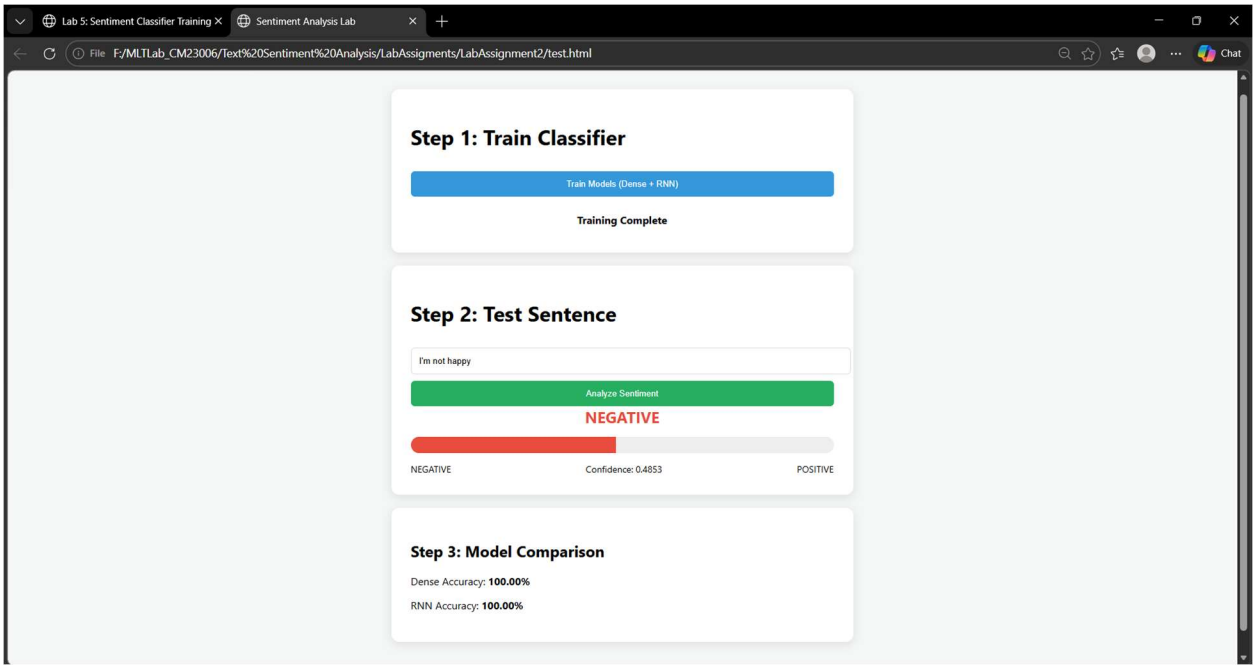
Text Sentiment Analysis

Lab 1



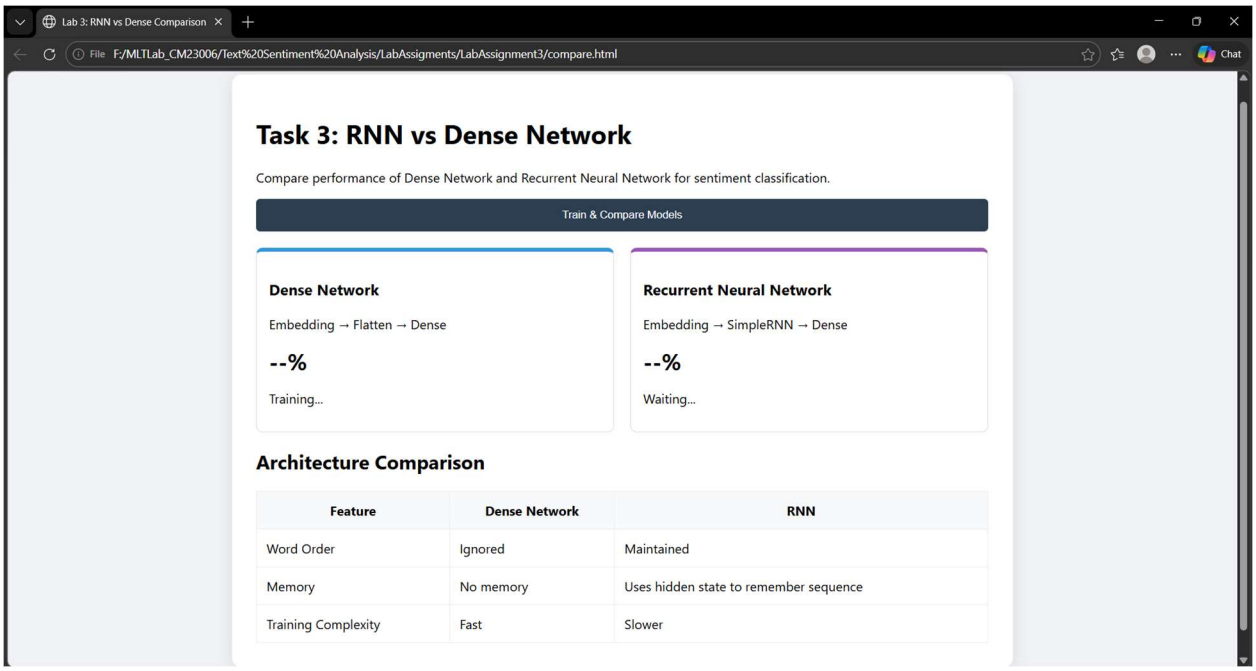
Lab 2





Lab 5: Sentiment Classifier Training
Sentiment Analysis Lab
File F:/MLTLab_CM23006/Text%20Sentiment%20Analysis/LabAssigments/LabAssignment2/test.html
Chat
Step 1: Train Classifier
Train Models (Dense + RNN)
Training Complete
Step 2: Test Sentence
I'm not happy
Analyze Sentiment
NEGATIVE
NEGATIVE
Confidence: 0.4853
POSITIVE
Step 3: Model Comparison
Dense Accuracy: 100.00%
RNN Accuracy: 100.00%

Lab 3



Lab 3: RNN vs Dense Comparison
File F:/MLTLab_CM23006/Text%20Sentiment%20Analysis/LabAssigments/LabAssignment3/compare.html
Chat
Task 3: RNN vs Dense Network
Compare performance of Dense Network and Recurrent Neural Network for sentiment classification.
Train & Compare Models
Dense Network
Embedding → Flatten → Dense
--%
Training...
Recurrent Neural Network
Embedding → SimpleRNN → Dense
--%
Waiting...
Architecture Comparison
Feature
Dense Network
RNN
Word Order
Ignored
Maintained
Memory
No memory
Uses hidden state to remember sequence
Training Complexity
Fast
Slower
